OLIVER WESTIN

Developer in Stockholm · builds and runs self-hosted software

Stockholm, Sweden
tjabo.dev
github.com/Tjabooo
linkedin.com/in/oliver-j-p-i-westin

Developer who learns by building. I studied **Information and Communications Technology** at KTH, and I design, ship and run my own software end to end: a **media server that friends and family use every day**, low-level **Linux and Vulkan tooling** for gaming, and the tools behind a three-machine home network. At home anywhere from C and Rust to Node.js web apps and Windows server operations.

EXPERIENCE

Machine Operator · Apotekstjänst — Jun 2026 – now

Lidingö · started as Production Pharmacist over the summer (Jun – Jul 2026)

- Run **VMI INDIVION** machines that pack patients' medicines into daily-dose pouches at high volume.
- Change medication canisters, monitor runs and clear machine stops under strict quality and hygiene routines.

Private Study Coach · Allakando — Apr 2025 – Jul 2025

- Tutored upper-secondary students one-on-one, in person and online, with personal study plans and homework.

Research Interviewer · City of Stockholm — Jul 2024

- Interviewed residents and businesses in inner-city Stockholm about their finances, as input for the city's planning.

SELECTED PROJECTS

Marquee — 2026 – now

Self-hosted, phone-first media server that I run around the clock for friends and family: one-press downloads, Watch Together rooms, casting to TVs (DLNA/AirPlay), automatic MP4 conversion, subtitle auto-sync and frame-exact clip editing. Hardened after a security audit (sign-in, CSRF, least-privilege service); public release v1.1.

`Node.js 22 (no dependencies) · FFmpeg · SSE · qBittorrent API · TMDB · Windows service`

ember-latency — 2026

Vulkan layer that measures real click-to-photon latency in any game, from the input event to the frame on screen, live in MangoHud with no measurable FPS cost.

`C · Vulkan · VK_EXT_present_timing · Linux evdev`

Archfleet — 2026

Terminal dashboard for every machine at home over plain SSH: status, wake-on-LAN, processes, files, and one clipboard history shared between Linux and Windows.

`Python · Textual · SSH · PowerShell`

Clipper — 2026

Lightweight replacement for Medal/ShadowPlay: always-on replay buffer, review queue, trimmer, and clips stored on my own server instead of a cloud.

`Python · gpu-screen-recorder · OBS · FFmpeg`

agent-mesh — 2026

Gives AI coding agents (Claude Code, Codex) one shared set of instructions, memory and settings across three machines, synced through a git repo over SSH.

`Python · Git · SSH · systemd`

EDUCATION

KTH Royal Institute of Technology — Aug 2025 – Oct 2026

Information and Communications Technology (BSc programme), studied 2025–2026

Stockholm Science & Innovation School — Aug 2022 – Jun 2025

Technology Programme, Information and Media Technology

Including Mathematics 5, Physics 2, Programming 1, Web Development 1, Computer and Network Technology, English 7.

SKILLS

Languages	Python, JavaScript / Node.js, C, Rust, Java, C#, PHP, Lua, SQL, Bash, PowerShell
Web	Next.js, React, HTML/CSS, REST and server-sent events, WebGL
Systems	Linux (Arch, Debian), systemd, Windows 11 as a server, networking, VPN, DNS, Secure Boot, Git, GitHub Actions
Media	FFmpeg, video encoding (H.264, HEVC, AV1), PipeWire audio
Spoken	Swedish (native), English (fluent)
